Claims 1, 6-10 and 12 are presented for examination.

Applicants' amendment and response filed September 10, 2007 have been received and entered.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6, 8-10 and 12 are again rejected under 35 U.S.C. 102(b) as being anticipated by Riley et al., Environmental Toxicology and Pharmacology 7 (1999) 109-118, of record, for reason of record as set forth in the previous Office action dated June 5, 2007 at pages 4-5 as applied to claims 1, 6, 8-10 and 12.

Applicants' remarks regarding the prior art, Riley et al., does not teach the instant agent that specifically inhibits *de novo* synthesis of ceramide in human cells but using animal cells such as mice are not persuasive since the animal cells or animal models are routinely used to perform experiments and are equivalent to human cells experiments. Inherently, the experimental data results from the animal models are sufficient enough for human cells results.

The rejection made under 35 USC 102(b) is adhered to.

Claims 1, 6, 8-10 and 12 are not allowed.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1, 6-10 and 12 are again rejected under 35 U.S.C. 103(a) as being unpatentable over Riley et al., *Environmental Toxicology and Pharmacology* 7 (1999) 109-118, of record, for reason of record as set forth in the previous Office action dated June 5, 2007 at pages 5-6 as applied to claims 1, 6-10 and 12.

Applicants' remarks regarding the prior art, Riley et al., does not teach instant active agent is used in human cells to decrease the amount of mature sterol regulatory element binding proteins and cholesterol synthesis are not persuasive since the applicants have not demonstrated on the record a side-by-side comparison of the results from the prior art versus the present invention. The results from the present

invention produce unexpected results over the animal models producing the same desired mechanism.

The rejection made under 35 USC 103 is adhere to.

Claims 1, 6-10 and 12 are not allowed.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
